

# GROUNDS REPORT

## RV PARK

Work is proceeding on the RV Park. A site plan has been drawn up and approved. As soon as the septic systems are finalized and approved, work will begin. Work will continue as long as funds are available. If you are interested in giving towards this project, you may mark the enclosed sheet accordingly.

## AREA CLEARED

Thanks to the generosity of a neighbor, an area of the camp was bulldozed. It has been worked down and seeded. The plan is to use this area for a low ropes course and possibly miniature golf.

## OTHER WORK BEING DONE

- \*\*house repairs are nearly finished
- \*\*looking for playground equipment
- \*\*replaced stainless refrigerator (thanks to generous gift of supporter)
- \*\*new benches (from downed cedar trees) for campfire area
- \*\*repainting of several floors
- \*\*mowing and weed eating (PTL for volunteers doing most of this!)
- \*\*cleaning, sorting, and reorganizing of several sheds

## GBC TEAM NEWS

NATE & REBECCA continue to get settled in and become more involved at GBC. God provided Nate with a part-time job until their full support is raised. Rebecca is doing volunteer work at the Pregnancy Center. Nate got his lifeguard certification. Nate's help as a lifeguard and Rebecca's help as a nurse will be a great asset during camp this summer. They are also a great help with the buildings and grounds projects and upkeep.

ADAM & BECKY are busy with programming responsibilities like securing staff, training staff, running background checks, making schedules, planning recreation, preparing lessons, etc. Becky will be directing and teaching the girls wilderness camp and teaching Children's #1 camp. Adam & Becky will be doing recreation at Sr. High camp. Adam will be running the program at most of the camps. And that is just part of what they will be doing during camp!

BILL & BRENDA are grateful for the other team members help! They are busy keeping them busy 😊 Seriously, there is much paperwork to do and organization of details to keep camp ready for all the activities planned for the summer. They continue to be actively involved in all aspects of the camp. Bill had a recent health concern when a mass was found on his upper right lung. Tests have been run but the results are not back yet. (The specialist does not think it is cancer)
